

## PO30

### SOLAR 5W - 20W LED AREA LIGHT (WITH 10' OR 15' POLE)

Utilizes super-efficient high-output SMD LED technology.

Complete 3D lighting renderings available for your application.

This compact, commercial grade, solar powered area light is the perfect addition or replacement light fixture for neighborhoods, school campuses, parks, general open areas, or other similar applications.

The fixture is pre-programmed to operate using one or more of its operational modes. Choice of timed modes and a choice of LED power for each mode from 1% to 100% output. The LED lights will automatically turn on at dusk and operate as per programmed mode(s).

The end-user or installer can select the LED color temperature. Choose from warm white (3,000k) or white (6,000k). A small, digital, LCD display shows battery and charge status.

This black colored light fixture has a solar panel that is integrated into the top section and a high capacity lithium battery pre-installed within. There are four panels on the underside that house the LEDs so that the lighting distribution is 360 degrees.

Supplied complete with a choice of either a 10' (3M) or 15' (4.5M) black pole.
