SOLAR STREET / PARKING LOT / AREA LIGHT 15W~25W LED Power - Complete System With Pole

- Sold as a complete, stand-alone, self-contained solar powered light.
- The fixture is of die-cast aluminum construction with a black powder coated finish and the pole is galvanized steel with a black painted finish. Other colors by special order.
- Features unique, fully integrated, vertical, 360-degree solar panels which are wrapped onto cylindrical modules.
- Designed and preprogrammed to automatically operate from dusk to dawn or use one or more single or dual timed modes, as required.
- Dimming (at any percentage and for any duration) is possible with any of the operating modes.
- An integrated motion sensor is available as an option.
- Choice of 15W~25W LED power (2,000~5,000 lumens).
- Choice of LED color temperature (CCT). Select warm white (3,000k) or daylight white (5,000k).
- IES, LM79, LM80, and BUG reports available upon request.
- The light fixture is approximately 36" tall (including tenon and finial) and 24" diameter (at its widest).
- Choice of pole height from 10'(3M), 15' (4.5M), or 20' (6M). Other heights available by special order.
- Solar panel wattage options are 100W (one module), 200W (two modules), or 300W (three modules), or 400W (four modules).
- Preinstalled 12.8V DC lithium battery capacity options 154WH, 307WH, or 614WH.
- Anchor bolts and template are included with the pole.
- The solar panel size (wattage) and battery size (capacity) is based on the total LED power, geographic location of the site, and the hours, times, or modes of nightly operation.
- Ideal for streets, parking lots, trails, public spaces, and general outdoor areas, etc.
